

Do you want to be a part of an interesting international company?

Mechanical Engineering interns - machine construction and process technology

We have several years of experience with interns, and we are now looking for new engineering interns in different technical fields.

As an intern, you will be a part of the existing teams and you will take part of the assignments equal to the other engineers.

We are looking for an intern with interest in machine construction and process technology.

The internship consists of project management, construction and documentation of machines and systems as well as assembling and implementation of machines in the production with "hands-on" pneumatics, programming, and control.

You will be a part of the company's **product technical department**.

The period of the internship will be coordinated in collaboration with you and your supervisor so that we achieve the best possible match between your educational needs and the company's current needs.

We expect you to have interest, drive and that you are professionally strong in the abovementioned areas.

Please send the **application** with your CV and transcript to job@redhorse.dk

RED HORSE provides professional fastening solutions for construction and industry globally. We work project-oriented with exciting and demanding customer projects, where we develop unique products and solutions for the customers.

Our goal is to be the preferred and most innovative partner in fastening solutions, and we believe that dynamics and great commitment combined with strong professionalism is the way to great results and satisfied customers.

We offer an interesting and challenging paid internship in an innovative and visionary technical growth company with location in Denmark and several international subsidiary companies.

We work efficiently and go for results in a different and unconventional way where dynamics, high speed and fighting spirit is a part of the informal everyday life.

For the right candidate there will be opportunity for professional as well as personal development in the job.
